

## Ceramic Samples of Technique Sheets

Remember that you will need to have at least 3 technique sheets for the three skills learned. This information is to be placed in the e-Record under the Specific Project Information.

Here are some examples to help guide you through the process.

### Technique Sheet

Complete a technique sheet for each piece you made during the year. Keep your technique sheet in a notebook for future reference.

Include your technique sheet with each piece you exhibit.

Clay used: earthenware

Skill: Title Textural Glaze

Give the steps in order of application (include product names and numbers, firing, number of coats, brushes and so forth).

Materials used:

Cleaning tool, sander, sponge, air compressor, Tinkers 5/8 brush, clean empty yogurt container. Clear Glaze, Mayco Astro Gem AS-545 Purple Quartz and Ceramichrome P600 Galaxy Glaze Sealer.

Step 1.

I picked out my Jewelry Box at Hobby Hut Ceramics. Then I cleaned the seam with the cleaning tool. Remove the excess seam lines from box and lid with the sander. Wipe over the entire box and lid with a wet sponge. I then took my box to Hobby Hut and had it fired to cone .04

Step 2

After picking up my box from Hobby Hut, I blew the inside of the box, and the lid out with an air compressor to make sure all the dust was out. Then I made a wash of 3/4 clear glaze and 1/4 water. I put this in the yogurt container to mix it up, and then I put this inside my box, and rolled it around until the inside was completely covered. I repeated these steps with the lid to my box. I then dumped the excess out back into the container. I set my box and lid upside down to dry so that the excess wash would not settle in the bottom of the box and the lid. I did these steps one more time.

Step 3.

Shake the Astro Gem Purple Quartz well. I then applied one heavy coat of Purple Quartz to the outside of my box and lid using a Tinkers 5/8 brush. After paint was dry, I did this again two more times making sure the paint was dry before applying the next coat.

Step 4.

Take the box and lid into be fired again at cone .06

Step 5

Pick up piece and make sure stilt marks are removed.

Step 6

Apply P600 Galaxy Glaze Sealer with Tinker 5/8 brush.
